

# Religions for Peace

Latin America and the Caribbean

## **SOLIDARITY WITH THE AMAZON**

The Latin American and Caribbean delegates to the **10th World Assembly of Religions for Peace** raise their voices in the face of the terrible devastation in the Amazon, with tens of thousands of hectares affected for fires that could be prevented. We join the pain of the peoples that inhabit these lands and urge the countries of the Amazon Basin and the entire international community to provide emergency assistance. The thousands of fires in the Amazon are part of the multiple almost simultaneous fires that are occurring in various parts of the earth, which is proof that global warming is unquestionable.

We raise our prayers and meditations for our brothers and sisters in the Amazon and for our mother earth, who suffers and who cries out our determined global action for climate change.
